Apply 3-6 drops daily to **horse's hoof sole** undiluted for abscesses, thrush or fungus

Approx. 250 drops in 15 mL

The intelligence behind this legendary blend:

Clove Oil: Immune enhancing, powerful antioxidant

Lemon Oil: Powerful antioxidant, natural solvent and cleanser, supports circulation

Cinnamon Bark Oil: High in antioxidants, supports digestive system, relieves discomfort

Eucalyptus Oil: Highly antiviral, supports respiratory system, antibacterial

Rosemary Oil: Naturally energizing, helps to restore mental alertness when experiencing mental fatigue

THE LEGENDARY STORY OF THE OUTLAW THIEVES

The history behind the band of Thieves is an interesting tale! While there are a few versions of the story they all surround one event, the Bubonic Plague. During the 15th century Europe was absolutely ravaged by the bubonic plague known as Black Death. As the plague claimed victim after victim, a band of thieves took to the streets. Fearlessly they pillaged and plundered the bodies of the dead, seemingly immune to the deathly disease that had claimed the lives of those they were robbing.

Daily they dodged being caught by the king's men, until one day they finally lost their luck and were brought before the king. The legend goes that the king and his judges were shocked by the indifference towards becoming infected and the apparent immunity to it that this wily crew of outlaws showed. It's interesting to note here that, during this time writings suggest physicians were seen wearing long black robes, wide brimmed hats, and masks that appeared to have a beak. The masks were said to have contained a combination of herbs and essential oils that the physicians would breathe in order to keep themselves safe from those afflicted with the illness. Their long black robes were also said to be doused in a similar fragrant concoction and current research continues to build upon this theory. So, they struck a deal: give us your secret and walk free.

The thieves divulged they had been using a concoction that protected them from the sickness. This now legendary blend of the thieves was rosemary, lemon, clove and cinnamon, and Eucalyptus. They used it to wield against one of the most devastating pandemics in human history. Hence the story of Outlaw Thieves.

We are absolutely inspired by this amazing recipe of botanical protection, so naturally we had to make our own blend. Based off the recipe found in the Royal English Archives, Ranch Life Naturals Outlaw Thieves is a blend of Rosemary, Lemon, Clove, Cinnamon and Eucalyptus essential oils.

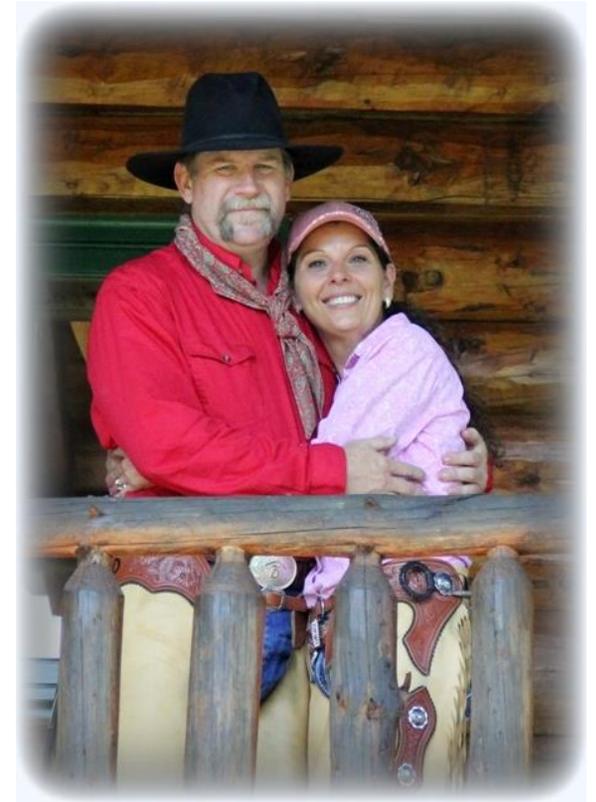

Use this ancient and legendary blend against all kinds of bacteria, viruses and pathogens. Diffuse it throughout your home, mix it with vinegar for an instant disinfectant, breathe it in when you're feeling sick (or like you're about to be sick), spray it throughout your home or barn...its uses are endless and always protective.

Please Note: As the owner and founder of Ranch Life Naturals I make no claims to be a physician or a veterinarian to give any medical advice. I am a person that uses natural alternatives where possible. If you have any health issues, please contact your physician before using Outlaw Thieves. If you are allergic to any of the ingredients listed for Outlaw Thieves do not use, and if you use Outlaw Thieves and have an allergic reaction, discontinue use.

Paying it forward with a wellness blend in honor of the team of 15 Doctors that saved Derrick's life, the support of our family, friends and community who helped us and believed in us. You are all our heroes. A portion of the proceeds from the sales of every drop of our Outlaw Thieves Essential Oil blend will be donated to the John Ritter Research Foundation for Aortic and Vascular disease.

The seed that germinated Ranch Life Naturals lies in a chapter of the journey that Derrick and I share together. The drops of Outlaw Thieves will help support research so others can have a success story like ours... In 2006 Derrick survived an aortic aneurysm and aortic dissection after being air lifted to Abbot Northwest in MN for a 7 hour surgery. Less than 1% survive a dissection as severe as Derrick's, and half of the survivors live about 2 weeks and from there half can live up to 10 years. Today the doctors tell us Derrick is a medical anomaly. He has been part of a study since 2006 in effort to help doctors learn more about aortic dissection to be able to help others, as only a few survive from such a severe dissection. He has an artificial St. Jude's heart valve and a Dacron aortic arch. After open heart surgery, recovering from a stroke and 1 liter of fluid around his heart, just 3 short months later, we discovered that Derrick also had colon cancer. After a resection to remove the cancer and a lot of prayer, with the life challenges that we were given, we know for sure that God wasn't ready for him. Derrick is the strongest man I know with with the will and strength to live like no other. I am so blessed to walk this journey holding the hand of a gift from God. Derrick has been part of a study since 2006 in effort to help doctors understand, learn and help others. When survival comes against all odds, so does change and research. What we put in and on our bodies and the animals we love became more important than ever. We still enjoy treats, live our life to the fullest and make each day count. We do our small part to make a difference in this world by developing all natural safe products that will help you on your journey through life. Thank you for taking time to find out about us. We hope you find some of our products will suite your needs, help you or inspire you.

Happy Trails,
Sue & Derrick

Aortic dissection is a silent and often misunderstood killer that, along with related vascular diseases, is a leading cause of death for both men and women. The John Ritter Research Program in Aortic and Vascular Diseases is working hard to try and prevent premature deaths due to aortic dissection through identifying genes that predispose to the disease (a first step in identifying who is at risk), understanding why the disease occurs, and identifying new therapies to prevent aortic disease. Ranch Life Naturals donates for research in efforts to help to make it possible for the dedicated staff to accelerate their research into the genetic causes of the diseases and discover new therapies to prevent premature deaths.

We are grateful for your support of this important program, and we cannot thank you enough. Purchasing our Outlaw Thieves will not only help you and your family stay well, it will help the continued research for Aortic Dissection.
